"ANARCHISM is a process of awareness in applying social experiments. It is valuable in everything we do, in dealings with ourselves, to those close by us to any social setting. It doesn't have to involve this titanic clash with the death ship all the time."

The Mythology of Hope an article by Jeardin M. Hutchins (SPIDA)

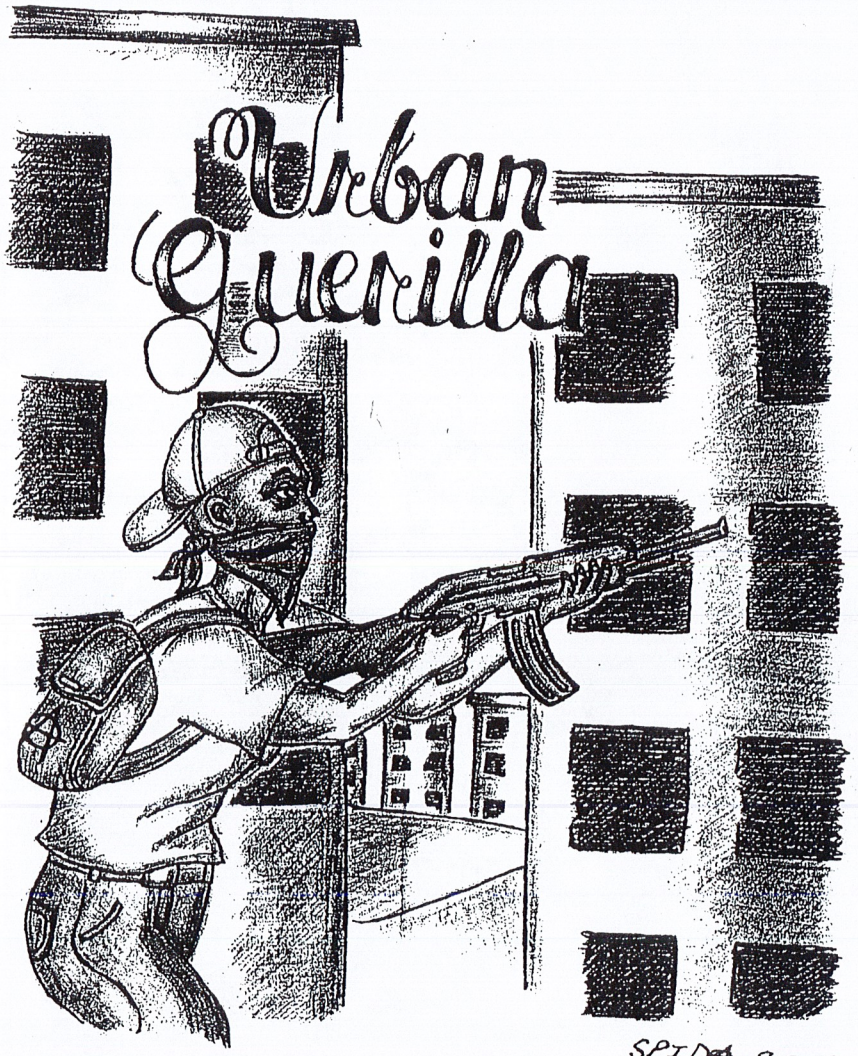
We've gotten rid of St. Louis prosecutor Bob McCullough! Alright, now maybe we can get the more progressive and reform-minded black candidate Wesley Bell to start prosecuting all those "killer cops"! After all, he is straight out of Ferguson!? You know, the same way President Obama was supposed to change Amerikkka, remember? Well he did pass laws that freed a few low level drug offenders right? While the majority of prisoners are locked away for double digit sentences because of so-called violent crimes. But we got a black president so it's all good right?

This is the illusion of progress and change under the banner of democracy. The Mythological hope. Just as President Obama did not have the power to bring about any real change, so neither can a new black prosecutor in St. Louis. These black faces in high places are a product of Domestic Neo-Colonialism, a system put in place to keep the lumpen and proletariat classes hopeful for better days. For if they were to lose hope then they would become restless and would eventually revolt in attempt to throw the [redacted] yoke off of their necks.

If we stand around forever constantly debating over dialectics, historical materialism, analysing with all of our social sciences, etc., circling the opponent looking for a weakness to exploit, we will never know true freedom. At least not in this lifetime anyway. The fact is there will never be an "ideal moment" for a revolution. We must spring into action knowing full well the fate that awaits us. Like the Japanese Kamakaze fighter pilots we must do that which is our duty do [redacted] even if it is a suicide mission. Selfless sacrifice is never in vain. It lets the world know that we are serious and not just a group of men who make a hobby out of revolutionary ideas and idle chatter.

Each of us must play our own specific essential roles. Those with resources and communication lines should maintain the social net and information highway for all active anarchists. These few individuals are our most valuable assets because of their power to inform, educate, and connect the rest of us. Those #2

We lumpen proletariats, proletariats, and Thirteenth Amendment slaves are educating, advocating, agitating, and mobilizing for a coup. We are Anarchist, Marxist, Leninist, Maoist, Trotskyist, etc., labeled by the U.S. as the "radical left." But in all actuality we are Freedom Fighters here to



in determination, will, and morals which will bring in numbers. They call us the minority because they, the handful of filthy rich capitalist, divide us into sects. But we the people are the majority when we look past race, nationality, skin color, etc. We are the people.

We are Plotting as Well  an article by Jeardin M. Hutchins (SPID Ⓐ)

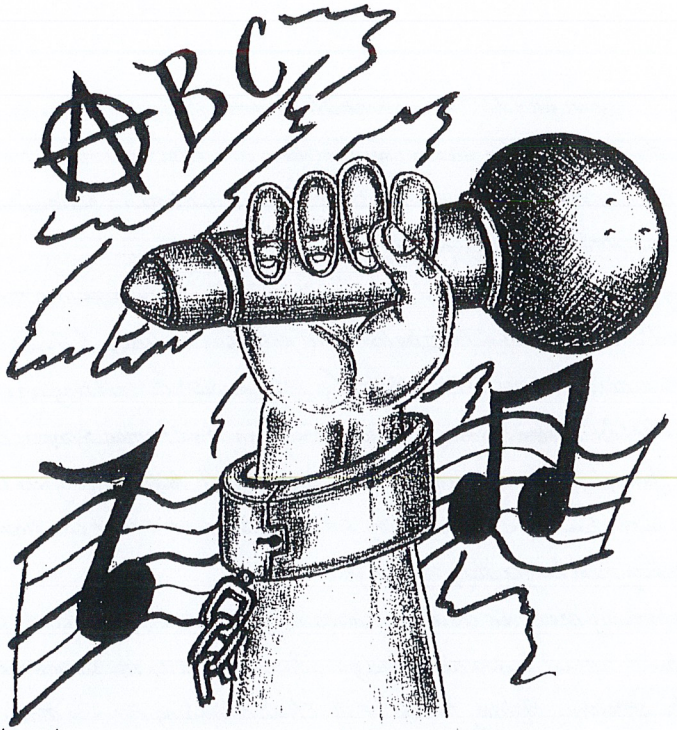
In the spirit of Internationalism we must take into consideration the Fate of humans all over the world. For instance, in eastern Europe, right now, you have Russia indirectly annexing Ukraine, Belarus, Germany, and other nations with its Nord Stream 2 oil and gas pipeline, making these nations economically dependent dependant upon Russia. These are decisions made by leaders with little or no say so from the citizens.

Donald Trump and the rest of the United Snakes are afraid; they feel their power grip loosening. Trump publicly rebuked German Chancellor Angela-Merkel on July 11, 2018 for Germany's decision to buy a massive amount of gas from Russia. "I think it's very sad", he said "When Germany makes a massive oil and gas deal with Russia, where you're supposed to be guarding against Russia, and Germany goes out and pays billions and billions of dollars a year to Russia." Trump's real problem is not Germany's not guarding against Russia, but Germany being no longer dependent upon Amerika, and Russia continually growing stronger.

The U.$ spent billions rebuilding Germany after World War II and not as an act of charity but as a Imperialist power move. Now Amerika Feels Germany owes it unwavering loyalty. But like a gold digging harlot Germany has gotten all it can get from Amerika and sold herself to the next big shot: Russia. Germany is also pulling away from NATO.

But NATO never had Germany's best interests in mind anyway. As its First secretary general Hastings Ismay, explained: "Keep the Russians out, the Americans in, and the Germans down." These imperialist Fascist super-powers are scheming are one another trying to gain the upper hand so that the victor may continue to exploit the so-called "Third World Nations" of undesirables without interference. As if they ~~so called~~ haven't already stuffed their coffers with enough stolen wealth to keep their progeny obese, spoiled, and egotistic for many generations to come. But while these #1

Mega Corporations duke it out, lying, cheating, and stealing, we are plotting as well. The under ground has plans of it's own.



The Music that I write is bold, aggressive, radical and revolutionary. A sound and style appealing to young, middle-aged, and older generations; meant to awaken the hip hop zombies, and light a Fire up under their ass!
Words are very powerful and the gifted leader and orator has the magic voice that can lift the hearts and spirits of the defeated, enlighten the minds of the ignorant, and spur the lumpen into action. -Comrade SPID Ⓐ

like myself, lumpen and 13th Amendment slaves with little to nothing to lose, must play the role of urban and prison guerilla; insurrectionists striking terror into the hearts of government officials (and I don't mean killing innocent citizens); the Anarchist Vanguard Party.

Although non-violent peaceful protests have proven to be a pain in the ass of the United Snakes, I am a Firm believer in political violence. I do believe that there is a need for the Attentäter (a revolutionist committing an act of political violence). I [redacted] agree with Emma Goldman that human sympathy is expressed through political violence. I also agree with Anthony Rayson that violence, as part of a fluid revolutionary situation, is a tactic that can have effect... killing them before they can kill you.

The community needs our elder anarchists to teach, inform, and educate us. The younger brothers must be warriors and guerillas, protecting the community and going on the offensive. Fighting the "war of the Flea". Attacking from so many different angles like a cancer, killing this corporate beast from the inside out.

My hope is that more of us slaves will awaken from our slumbers, realize that we have been had, and that this elusive hope is only a myth. Then we may unite and shake the pillars of each plantation to its foundation, making headlines across the globe while our comrades in society make our voices heard so there will be no question of our motive: Freedom.
