

As always, our local officials are sneaking behind our backs and cutting another sinister deal - this time to bring a giant Immigration Detention Center (prison) right into our lap! 2  
Einhorn and his cabal have been negotiating with ICE (Immigration & Customs Enforcement) and CCA (Corrections Corporations of America) to become the middle man in basically what is a modern-day slave trade!

It sounds alarmist, but it is based on fact. A wake-up call is in order, anyway. The 13th Amendment to the U.S. Constitution, which is credited with "ending slavery" made one exception - those convicted of a felony are still - to this day - legal slaves! Those held in Immigration Detention Centers have even fewer rights because they lack citizenship, which, although a civil violation, is nowadays treated as a criminal offense.

Obama, painted as some sort of "liberal" has stepped-up the capturing, incarcerating and deporting policies of George W. Bush. Four hundred thousand individuals are deported each year - and it's growing. Several new detention centers are planned all around the country, in places like Texas, Florida and Illinois...

Here's the deal. ICE gives Einhorn & Crew, say \$90 per head, per day, to "house" these people, arrested from throughout the Midwest. CCA, which runs for-profit prisons and detention centers (basically the same thing) then cuts a deal with Einhorn to do the dirty work for say, \$70 per head, per day.

Great deal, right? No, it's a horrible deal and here's why. Crete will be turned into a "prison town." This is the last resort of a failing farm community throughout this country. Sadly, more often than not, the forlorn town that agrees to such an arrangement, regrets having made that decision, or more honestly, not being willing or able to stop local officials, who've basically assumed all decision-making powers for the towns, they're mayors of. The Trustees rarely even want to challenge his or her agenda. It's how (un) democratic local politics plays out in this country.

So, this would now mean a sort of generalized heightened *policization* of the community and the surrounding communities. Cops will be ubiquitous, as would buses full of shackled prisoners ("detainees") going to or from the Crete facility, to court or to be deported. The meager services, such as the police, fire and ambulance service, would be basically, at the mercy of any and all problems at the "Center." The

programs, youth activities, affordable housing, etc. Our taxes get confiscated by government and seem to go into a black hole of waste and corruption. Only the interests of those rich enough to "buy" the politicians seem to get these monies lavished back upon them. The rest of us have "cuts" - pay cuts and service cuts, while taxes and fees and the cost of everyday life continues to go up and up! We do not need our tax money spent on prisons - *especially* if they are privately run! Why make obscene profits for a bottom-feeder corporation, who preys on the exploitation of human misery? Many of these draconian laws that send minor violators to prison are created by CCA-type private prison corporations and then spoon-fed state legislators, who enact the legislation. The only thing most legislators really care about is getting re-elected. There's no accountability and failed policies and huge wastes of tax money never are pinned on them, for the crimes that they truly are. We just have to suffer from their awful decisions, while they enjoy thick pensions. In fact, there's no accountability in the whole prison industrial complex (PIC) from the cops on the streets, to the smarmy lawyers, to the exempt from scrutiny prosecutors and deified judges. The crimes that occur in the prisons by guards, administrators and other prisoners are pandemic and a national abomination! Jay Leno jokes about prison rape - "haha!" Families lie in ruins and lives have been destroyed!

We don't need a huge, unusable airport. We don't need endless wars and we don't need more toll roads!

Learn the truth of this complicated, inter-connected situation. Your neighbors who are doing the research are where you will find answers. It won't come from the lying government, scheming corporations, nor the bought-and-sold mainstream media!

Here's an eye-opening comparison. From 1960 to 1980, 253 new community colleges were built in 247 rural counties in the U.S. While 77 new prisons in 69 rural counties were also built. That's 253 colleges & 77 prisons.

From 1980 to 2000, 31 new community colleges were built in 31 rural counties, while 434 new prisons were built in 340 rural counties! See what I mean? From 3 1/4 colleges for every prison, we have gone to 1 college for each 14 prisons!!! The number of new colleges was reduced by over 800%, yet the number of prisons rose by almost 570%! We're rapidly turning into a sort of homegrown Stalinist Russia, with an American version of his hideous gulag archipelago!

The Illinois Tollway is looking for ways to ditch their workforce, go completely I-Pass and probably before too long, the State Legislature of Illinois, which has sunk the state to 50th out of 50 as far as economic solvency goes, will sell the Tollway, as Daley sold the Skyway. The Tollway is by far the biggest and really, *only* big asset it has left. If that happens, service will plummet, danger will increase and the tolls will skyrocket - like the Indiana Tollway has. 6

Einhorn is being wined and dined and soon they'll shove a contract in front of his face to sign this town's future away. The only thing that can stop this madness is if enough people in the area find their morality and courage to stand up to him and the creeps preying on our community.

I don't live in Crete. I live in Monee and have since 1990. My younger son, like his older brother did, goes to Crete-Monee High School. I have been fighting for our area for a long time, as many of you must know. I want my children and their friends to have a real future in this area. For generations, our forebears have sustained this lovely area so that we can now live here and enjoy this pristine, bucolic wonderland. We cannot allow these scheming politicians and their drooling "business partners" to bulldoze away our future and replace it with asphalt, concrete, cages, endless lines of diesel-spewing trucks, police, helicopters, prisoner transport buses, barbed-wire fences, cameras everywhere, noise, air, soil and water pollution and the end of a real quality of life.

We don't have much time. Einhorn has never given a damn about Crete residents. He has to be forced to do the right thing! Each one of us has to make pulling the plug on this vile project a top priority.

Many people are being menaced more and more in this increasingly dismal country. Mass incarceration in this country is a horrific reality - and growing worse. The sad reality is that locking all these people up is not making us any safer, but it is sucking up all of our tax dollars, which we so sorely need for useful projects, like safer buildings (removal of asbestos), better parks, schools, opportunities, such as job-training, help with funding education, drug-rehab programs instead of automatic and fruitless incarceration, better senior care, child care, smarter, eco-friendly transportation solutions, such as bicycle lanes, sidewalks and bike paths, better bus routes, expanded commuter rail and high-speed rail.

We need our tax dollars spent on infrastructure and programs people actually need! These include better nutrition

residents won't see any of the dirty money, supposedly collected and would instead, be stuck with stressed-out, limited services. They would use lots of water, electricity and the roads, etc.

With approximately 750 people shoved into this facility, 3 underfed, poorly clothed, easily susceptible to disease and despair, problems would be constant! One of the ways CCA makes their obscene (for the big shots) profits, is to pay the guards and other workers poorly. Training suffers, corners are cut, the turnover rate is high and danger is increased, even from government-run joints, which are also dreadfully and dangerously administered.

Property values, already devastated by the greed and avarice of the Wall Street Bankers and other junk bond / mortgage money-packagers, will be further eroded by having a large detention center dominating the area.

Being on the edge of the endless threat of the "Peotone Airport" will give more impetus for this unwanted, unneeded airport.

Lately, the Will County Board, Jesse Jackson, Jr. and Governor Quinn have stepped up their efforts to force eminent domain down the throats of your farmer neighbors in this contrived "Airport Footprint."

Even though they can't agree on which group of incompetent boobs will "run" this airport, they still are in a hurry to destroy these productive, many-generation family farms. This, even though the FAA has yet to even rule on the need for it! Illinois politicians are about the looniest!

If Einhorn signs this deal, the ball begins to roll. He has also incessantly pushed for this airport (which all the airlines want nothing to do with) - as well as the "Illiana Expressway" (read: tollway.)

So, lovely Crete will be thrust in the epicenter of 1) a hideous prison, 2) an unneeded airport & 3) a superhighway (toll road) roaring through the area.

All of this will be orchestrated from *outside* of Crete. CCA will "privately" run the Crete Detention Center from their office in Tennessee. Jackson's weird ALNAC group, or Will County politicians, or some combination, making sure not to allow any local input - will "run" the airport and the Illinois / Indiana Tollroads will "run" the Illiana Expressway.

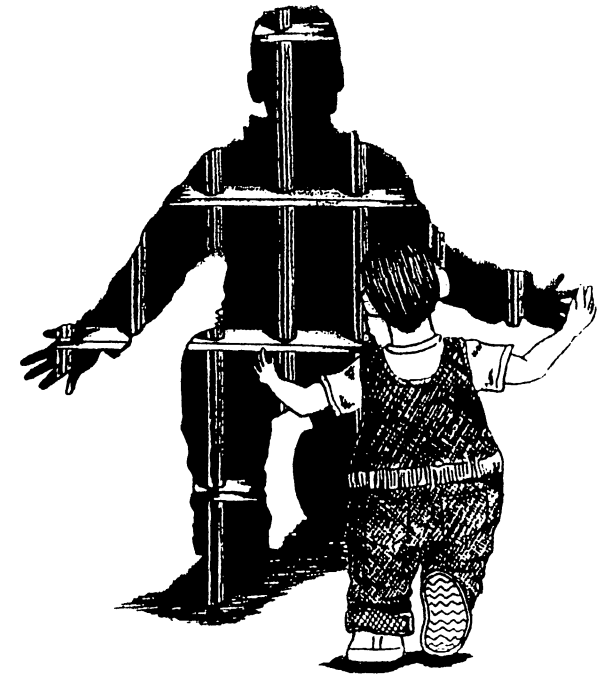

The Indiana Tollroad was privatized a few years ago. It is not even American-owned anymore, but is rather, owned by a Spanish-Australian consortium.
